PROFILE	Student engineer and founder building intelligent systems, security-focused software and practical AI applications. Currently pursuing B.Tech in Computer Science & Engineering (AI & Data Science), with hands-on experience across AI/ML, software engineering, cybersecurity and product development.
---------	--

EDUCATION	B.Tech — Computer Science & Engineering (AI & Data Science) Malla Reddy Vishwavidyapeeth × NIAT	2nd Year · Ongoing
-----------	---	--------------------

EXPERIENCE	Founder — Mitra Verify Startup · Identity Verification Platform Built and launched Mitra Verify, an identity verification platform. Designed system architecture, developed the full-stack application, and integrated AI-powered document analysis and semantic matching for identity validation.	Ongoing
	Client Project — Shree Vasudha Projects Client Engagement · Software Delivery Commissioned to design and develop software for Shree Vasudha Projects. Managed client requirements, development, and end-to-end delivery independently.	

SELECTED PROJECTS	Mitra Verify Identity verification platform with AI-powered document analysis, semantic matching, and security-focused architecture.	TruthLens Media credibility analysis tool using AI-assisted fact-checking and source reliability evaluation.
	Aura AI Conversational AI application built on LLM systems with context-aware response and session management.	Audit Flow Workflow tool for automated data auditing, structured validation, and audit trail generation.
	SEO Audit Hub Full-stack platform that automates page-level technical SEO analysis and structured audit reporting.	Hotspot Bypass Utility for automating authentication flows on captive portal hotspot networks.

TECHNICAL SKILLS	AI / ML Generative AI · LLM Systems · Text Embeddings · Semantic Search · Vector Search · Computer Vision · RAG
	Software Engineering Full-Stack Development · API Development · Automation · React · Next.js · JavaScript · TypeScript · Python
	Security Cybersecurity · Identity Verification · Security-Focused Software
	Tools Git · GitHub · Three.js · React Three Fiber

ACHIEVEMENTS & TECHNICAL LEARNING	- Adobe University Hackathon — 2026 - Maker Conclave — 2026 - Base44 Hands-On App Building Workshop - Vector Search in Practice: Semantic Search with LLMs - Autonomous Vehicles Workshop	- OpenAI Academy × NxtWave Regional Buildathon — Telangana — 2025 - Generative AI Mastery Workshop — NIAT - Applying Text Embeddings in LLM Systems - Robotic Arms 101
