PROFILE

Student engineer pursuing B.Tech in Computer Science & Engineering (AI & Data Science), with hands-on experience building AI/ML applications, full-stack web applications, APIs, and security-focused software. Interested in solving practical engineering problems through AI, software development, web technologies, and cybersecurity.

EDUCATION

B.Tech — Computer Science & Engineering (AI & Data Science)
Malla Reddy Vishwavidyapeeth × NIAT

2nd Year · Ongoing

TECHNICAL SKILLS

AI / ML	Generative AI · LLM Systems · RAG · Text Embeddings · Semantic Search · Vector Search · Computer Vision
Web / Software Engineering	Full-Stack Development · Web Application Development · API Development · React · Next.js · JavaScript · TypeScript · Python · Automation
Cybersecurity	Cybersecurity · Identity Verification · Security-Focused Software
Tools	Git · GitHub · Three.js · React Three Fiber

SELECTED PROJECTS

Mitra Verify

Built a full-stack identity verification platform combining AI-powered document analysis, semantic matching, and security-focused application architecture.

Technical focus: Full-Stack Development · AI/ML · Document Analysis · Semantic Matching · Security Architecture

Aura AI

Built a conversational AI web application around LLM systems, context-aware responses, and session management.

Technical focus: Web Application Development · LLM Systems · Context Management · Session Management

SEO Audit Hub

Developed a full-stack web application that automates technical SEO analysis and generates structured audit reports.

Technical focus: Full-Stack Development · Technical SEO · Automation · Structured Reporting

TruthLens

Developed a web application for media credibility analysis using AI-assisted fact-checking and source reliability evaluation.

Technical focus: Web Application Development · AI/ML · Fact-Checking · Source Evaluation

Audit Flow

Engineered a workflow application for automated data auditing, structured validation, and audit-trail generation.

Technical focus: Workflow Automation · Data Validation · Audit-Trail Generation

EXPERIENCE

Client Project — Shree Vasudha Projects

Designed and developed a client-facing web solution based on project requirements, working across interface development, implementation, and end-to-end software delivery.

HACKATHONS & PARTICIPATION

- Adobe University Hackathon — 2026
- Maker Conclave — 2026
- HackWithHyderabad 3.0 — 2026
- KILN '26 — The Hybrid National Build Gauntlet
- WebRush — 6-Hour Frontend Hackathon
- OpenAI Academy × NxtWave Regional Buildathon — Telangana — 2025

TECHNICAL LEARNING

- Base44 Hands-On App Building Workshop
- Vector Search in Practice: Semantic Search with LLMs
- Autonomous Vehicles Workshop
- Generative AI Mastery Workshop — NIAT
- Applying Text Embeddings in LLM Systems
- Robotic Arms 101
